BBCH 07 budburst · 65 flowering · 81 veraison · 89 maturity/harvest. Grey —: pending; ×: failed; ·: unrequested; n/a: unavailable.

MAE and bias: within-site means, then equal site weights. Bias = predicted − observed date; negative is early.

BBCH81/89 scoring can assign 4 November; an assigned date is not actual model attainment. Raw dates remain unchanged.

Process models only; parameters shared across environmental zones. No confidence intervals. Source: metrics.csv.
